Sir:

Pursuant to the provisions of 37 C.F.R. §1.312, please amend the above-identified application as follows:

MATCH & RETURN

IN THE TITLE:

Please delete the present title and replace it with the following new title:

Method And System for Log-In-Based Video and Multimedia Calls

IN THE ABSTRACT:

Please delete the present Abstract of the Disclosure and replace it with the following new Abstract of the Disclosure.

A system and method for presence-based video and multimedia calling by which a workstation is dynamically associated with a user based on user log-in information so that video and multimedia calls are routed to at least one workstation at which that user is logged in. This allows a caller to place a video or multimedia call to a recipient without knowing the network address of the workstation at which the user is logged-in or the physical location of the recipient.
